

MEDICAL NEWS : LITERACY RATE

RAPID GROWTH OF AI IN MEDICAL

Recent medical news from India includes a variety of topics, from advancements in robotic surgery to concerns about the impact of AI on healthcare. A study highlighted the potential link between prenatal acetaminophen use and neurodevelopmental disorders. Additionally, there's been discussion around the rising obesity rates in India and the need for healthy lifestyle initiatives. Here's a more detailed look at some of the recent developments:

Here's a more detailed look at some of the recent developments:

Advancements and Innovations:

Robotic Surgery:

The use of robotic surgery in India is expanding, with AIIMS, for example, implementing robotic surgery for enhanced precision and control.

AI in Healthcare:

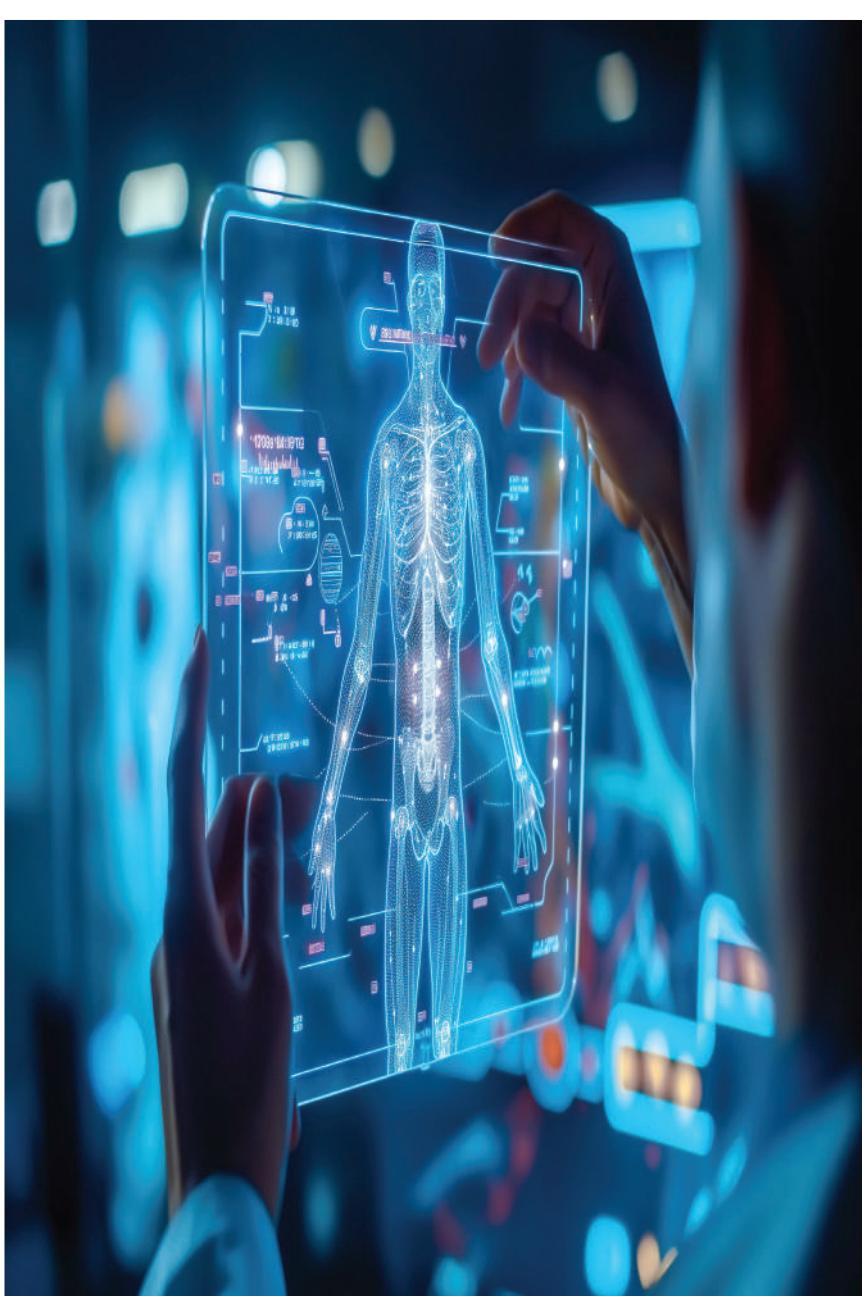

While AI offers potential benefits like more accurate diagnosis, there are also concerns about its impact on healthcare professionals, with one study finding that skills in detecting benign tumors decreased after using AI.

24/7 Cancer Care Helpline:

Apollo Hospitals launched India's first 24/7 toll-free cancer care helpline.

New Vaccine:

Pfizer launched a 20-valent pneumonia vaccine for adults in India, according to Healthcare Radius.

POLITICS : LEGACY

Decision-Making in Groups:

Politics is fundamentally about how groups of people, from small clubs to large nations, make decisions together. This involves various processes like discussions, negotiations, and voting.

Power and Influence:

Politics is inherently about power dynamics – how power is distributed, exercised, and contested. This can involve individuals, groups, or institutions vying for influence and control.

Resource Allocation:

A key aspect of politics is determining how scarce resources like wealth, land, and opportunities are distributed among different members of society.

Politics establishes the rules and laws that govern how people interact with each other and with the state. These rules can range from traffic laws to social welfare policies.

TAMILNADU LATEST NEWS: EVENTS AND POLITICAL DEVELOPMENTS

Politics is often compared to ethics (ideas about right and wrong). Ethics is a more abstract study of right and wrong. Ethics is usually more concerned with principle than law or politics or diplomacy, so many people think ethics is not practical. But without some agreement on ethics, there is probably no way to even have a debate, laws or an election. There is always some agreement on ethics and personal conduct in a political system.
